

New Programs

The Lesser Slave Forest Education Society has partnered with Inside Education to offer high quality, curriculum based programming on

Natural Resources and Electricity

These hands-on, interactive classroom presentations will be offered to Grade 4 and 5 classes in the Lesser Slave Region from January-April 2009.

Grade 4- Natural Resources and Energy

Emphasis is placed on both renewable and non-renewable natural resources, and how these energy sources are produced and used in society.

Curricular links: Alberta: A Sense of the Land & Plant Growth and Changes

Grade 5- Natural Resources and Electricity

Highlights of the presentation include: what electricity is, where it comes from, the distribution of energy sources across Canada and importance of conserving energy.

Curricular Links: Physical Geography of Canada & Electricity and Magnetism
